

# Math Coordinators

School: \_\_\_\_\_ Year: \_\_\_\_\_

Name of Math Coordinator PreK – 4: \_\_\_\_\_

Name of Math Coordinator Gr. 5-8: \_\_\_\_\_

Below please find a *few suggestions* that School Math Coordinators can do to improve the School Math program:

- Attend Math workshops and share insights at the Faculty Meetings
- Organize level meetings to go over the Math Core Curriculum...discuss greatest needs
- Study the Terra Nova Math results and share results with all teachers of Math on staff
- Organize math meetings for teachers to USE the different manipulatives. Where possible use the students using the manipulatives as the centerpiece of your discussion on manipulatives.
- Initiate a textbook study prior to purchasing new books. Every five years teachers should re-evaluate their math texts with an eye to purchasing newer texts.
- Coordinate the math manipulatives in your school...a common closet to store them!
- Initiate a study of the best buys in manipulatives. Investigate which Title money will cover the expense of the manipulatives.
- Investigate and advertise math workshops in the area.
